Muhammad Haris Khan

FRONT-END WEB DEVLOPER

Hi there!

As skilled Certified, front-end developer expert with over years of experience. I understand that it can be difficult (sometimes painfully exhausting) to find the right developer who understands development well. My experience has allowed me to create more than 100+ responsive and conversion-focused websites with an extremely high client satisfaction rate.

I have been privileged to work alongside inspiring entrepreneurs and business owners to help them achieve their goals by understanding the objectives, I offer design or development solutions that will best suit your budget and needs.

What others say...

✓ "Haris was amazing to work with. He seriously was super on top of everything, great at communicating with us, stayed on a tight schedule, and didn't compromise on the quality of work to meet our deadline. Like honestly the quality of the website he created for us was way better than I ever had in my mind, and it was worth paying the extra money to have him do some of the development. Everything came together seamlessly, on time, and we really couldn't be happier with the final product. Seriously thank you so much again, Haris, you're super talented and great to work with! Look forward to next time!" ⁎⁎⁎⁎⁎

✓ "Haris did an amazing job on the page we had him create. He was quick to respond to questions, provided great tools to help us communicate our needs, and was crazy fast. We provided a decent amount of feedback and direction about what we wanted, and Adil was able to fill in the gaps and just nailed it. It came out exactly how I had it in my mind. We're excited to hire Adil again in the future to help us finish our site. Thanks so much, Haris!" ⁎⁎⁎⁎⁎

✓ "Haris is the consummate professional. I entrusted him to make updates to a very expensive ($10,000) website and to add his style and tweaks. Due to time constraints, I gave him minimal guidance before he started. Haris knocked the job out of the park. His creative ideas exceeded my expectations. His coding skills and understanding of development are top-notch. Ultimately, I ended up paying him to double the agreed rate because I felt that he had more than earned it." ⁎⁎⁎⁎⁎

✓ "Haris stood out by being truly committed to completing the job to satisfaction. There were hiccups, and some were frustrating (for him as well as for me) and he patiently fixed the problems until the result was acceptable. It's hard for freelancers to get it right when their clients lack some fundamental knowledge, this is why projects with other freelancers didn't work out for me in the past. Haris willingly worked together with me in real-time rather than trying to understand what I was looking for, doing it on his own, and having to go back and forth. He's been great." ⁎⁎⁎⁎⁎
